

# NORDIC COBBLE™

## CIRCLE PATTERN

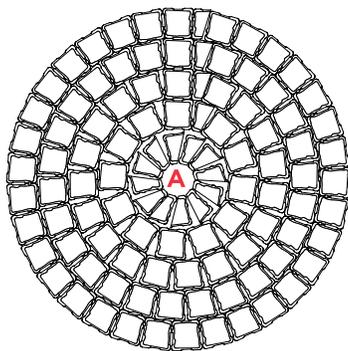

In order to build circles, modification cuts to several units are required to accommodate the tighter radii of the inner rows. Based on personal preference, you may choose to increase precision by making additional cuts.

**Note:** The very rustic style of Nordic Cobble allows for loose joint cuts which are visually forgiving especially once the joint sand has been swept in.

### ROW 2

**NOTE:** This row can also be modified for a tighter joint if desired.

### Diameter

Row 1 = 12"

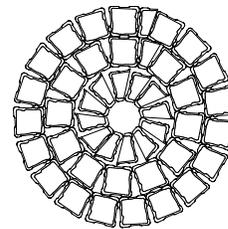

Row 2 = 20"

Row 3 = 28"

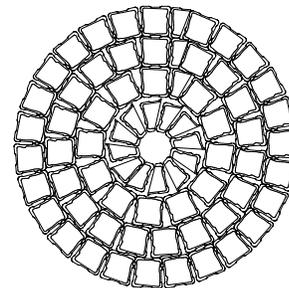

Row 4 = 36"

Row 5 = 44"

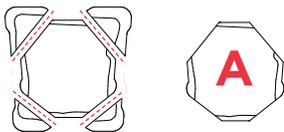

### ROW 3

### ROW 4

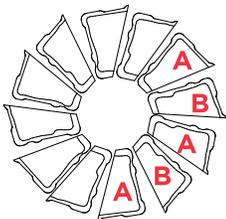

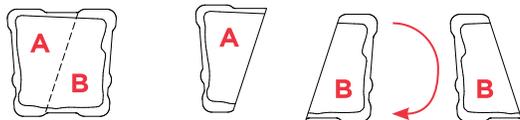

### CENTER STONE

4 cuts

### ROW 1 (MODIFIED UNITS)

**NOTE:** Fine tuning of the individual units can be done with a small grinder to round any sharp points or edges.

### ROW 5
